

FY 2003 TRANSPORTATION CAPITAL PROGRAM
New Jersey Department of Transportation Projects

ROUTE/PROGRAM

Project ID Number

Access Management

X153

This is the Department's share of funding for highway improvement projects advanced as a result of development and redevelopment. These funds are to be used when the fair share financial contributions obtained from a developer pursuant to N.J.S.A. 27:7-91h are insufficient to implement the improvement. These improvements will encourage economic development and help create jobs.

Access Permit Application Review

X166

The Department of Transportation has traditionally used consultants to assist in the review of access applications and on occasion to participate in the permit process to a greater extent. The Department has insufficient personnel to perform all of the work required within the time frames established by the Commissioner, law, and regulation. The timely issuance of access permits helps the State's economy by saving developers' carrying costs.

ROUTE/PROGRAM

Project ID Number

TRANSMIT Program

00376

TRANSCOM, a multi-agency coalition of operating transportation agencies in the metropolitan New York area, is deploying an Automatic Vehicle Identification (AVI) system, known as TRANSMIT, for traffic management and surveillance applications. TRANSMIT offers the ability to use vehicles equipped with EZ-Pass transponders to serve as vehicle probes within the traffic stream for traffic surveillance purposes. It requires the installation of readers (small 3-foot antennae) with the capability of identifying the vehicles equipped with EZ-Pass transponders, and measuring travel speeds at periodic intervals along the roadway.

Phase I and II were previously installed on major highways, mainly within New York state, through federal earmark money, and has successfully provided a surveillance system capable of detecting incidents. Phase III expands the system in New Jersey along Route 287, the New Jersey Turnpike, and the Garden State Parkway. The benefits of the system include the ability to track incidents for quick response, and provide real-time information to travelers over variable message signs and various media sources.

The FY 2002 federal appropriations provides \$2,500,000 from Intelligent Transportation Systems funds for this project.
